

## **2021-22 FENCING CATALOGUE**

WARATAH MEANS SOMETHING TO EVERYONE.

# WARATAH MEANS Australian Made More Control Local Knowledge

Waratah are the true fencing specialists. The Waratah brand means something to everyone - increased productivity, more time or even a brighter future.

## waratah means Anstralian made

Waratah has over 135 years of fence manufacturing and fence building experience in Australia. With mills in Whyalla SA, Geelong VIC, Rooty Hill and Newcastle NSW, our steel, wire and posts are made by Australians to suit Australian conditions.

Australian born and bred, we know what it takes to withstand the harshness of this diverse environment, whether it's rocky high country, fertile plains or steamy tropics. Our ongoing product innovation continues to meet the evolving fencing needs of Australian farmers right across this great country.

## WARATAH MEANS more control

Waratah's accreditation includes globally recognised quality standards SAI Global AS/NZS ISO 9001 and nationally recognised testing authority NATA ISO/IEC 17025. This consistency means that Waratah can provide you with the strong and reliable fencing you need for your farm.

## WARATAH MEANS local knowledge

Our experienced sales staff understand their local areas and are equipped with the knowledge to help with your fencing needs. They're backed by a national research and development team always working to create fencing system solutions to suit almost any application and condition.

#### **POST RANGE**

## POSTS

The key to a fence's strength and longevity, Waratah posts are the superior quality backbone to a better performing fence.

- All posts in the range work seamlessly with our wire and accessories for superior performance
- Effective strainer post assemblies help improve the life of your fence by carrying the strain of the wire and absorbing impact from animals
- Challenge your traditional fencing practices to discover the benefits of the complete Waratah Fencing System<sup>™</sup>

Covered in this section:

Strainer post assemblies

JiO® posts

Fence & Wire droppers

Blue Latch™ & GalStar® posts

#### **STRAINER POST ASSEMBLIES**

#### SPECIFICATIONS

Pipe:	89mm (OD) x 4mm (wall)	
Material:	250 grade pipe	
Coating:	Hot dipped galvanized (min 300g/m²)	
Lengths available: 2.15m, 2.50m, 3.25m		

#### **EZYPIPE<sup>®</sup> STRAINER POST**

The Waratah<sup>®</sup> round post alternative to traditional timber, pipe and concrete strainer posts.

- Best suited to medium-soft ground applications where the greater surface area and anchor points provide improved ground-holding capacity
- Economical to erect and capable of withstanding high pressure loads
- > Termite proof and fire resistant
- > Can be stayed up to 4 ways through 360 degrees and is also suitable as an in-line strainer
- > Hot dipped galvanized coating (min 300g/m<sup>2</sup>) for good corrosion protection
- Ezypipe strainer extensions can be used with an Ezypipe strainer post
- Anchor points on the strainer allow for Star<sup>®</sup> posts to be driven through as an anchor pin to provide greater holding capacity

Gate fittings available - see page 38

#### SPECIFICATIONS

Angle:	75mm x 75mm x 6mm	
Material:	300 grade angle	
Coating:	Hot dipped galvanized (min 600g/m²)	
Lengths available	engths available: 2.10m, 2.50m	

#### EZYSLOT<sup>®</sup> STRAINER POST

The fastest and easiest Waratah strainer post to manually install.

- > Best suited to hard-medium ground applications as the pointed end of the Ezyslot can punch through ground that would be more difficult for round strainer posts
- > Economical to erect and capable of withstanding highpressure loads
- > Termite proof and fire resistant
- 2.10m strainer can be stayed 3 ways through 90 degrees and 2.50m can be stayed 4 ways through 180 degrees
- > Hot dipped galvanized coating (min 600g/m<sup>2</sup>) for excellent corrosion protection
- Anchor points on the strainer allow for Star<sup>®</sup> posts to be driven through as an anchor pin to provide greater holding capacity

Gate fittings available - see page 38

### **ADJUSTA-STAY®**

One of the most versatile stays on the market. Can be used with the Ezyslot<sup>®</sup>, Ezypipe<sup>®</sup> and most timber, concrete or pipe strainer posts.

- > Fully adjustable and reusable stay (sold as a kit, see specifications)
- > Effective in all types of terrain including sloping, hard or rocky ground
- > Termite proof and fire resistant
- > Designed for strength, reliability and ease of use
- Requires no digging and can be installed in less than five minutes with correct tools (optional Adjusta-stay tube socket available)
- > Plastic ground engaging pad

#### SPECIFICATIONS

Ріре:	50NB pipe x 60.30mm (OD) x 2.30mm (wall) x 3m length
Coating:	Hot dipped galvanized (min 300g/m²)
Hot dipped tension rod length:	3.25m x M12 (12mm) with nuts and washers
Ground engaging pad:	Plastic (recycled)

See how quick and easy it is to install!

#### SUGGESTED STRAINER POST INSTALLATION HEIGHT

POST	ABOVE GROUND (MM)	IN GROUND (MM)
Ezypipe 2.15m	1300	850
Ezypipe 2.50m*	1400–1600	900–1100
Ezypipe 3.25m	2050	1200
Ezyslot 2.10m	1250	850
Ezyslot 2.50m	1350	1150

\*Adjustable collar locations using pre-drilled holes – collar comes pre-set at 2nd hole (1500mm above ground), but can be adjusted to 1400mm or 1600mm above ground.

## POSTS

POSTS

3-11

## Jio<sup>®</sup> Post Range

-

#### WARATAH® JIO HOLES

- > More holes than traditional Y posts for greater wire attachment options
- > Oversize holes accommodates running wire through holes (not recommended by Waratah)
- > Multiple accessory options for adding clips, ties, and electrics
- > JiO Longlife Blue<sup>®</sup> post clips deliver fast, secure wire fixing

#### WARATAH Y-BAR

- > Australian made EY60 steel grade designed specifically for use in post applications to deliver the right balance of strength, toughness and ductility - the best steel to weight ratio of any Star® post
- > Strength to withstand high impact loads, toughness to resist fracturing & ductility allows posts to be re-straightened

#### HOT DIPPED GALVANIZED COATING

POSTS

> Waratah's specialised hot dipped galvanized coating (600g/m<sup>2</sup> minimum coating weight) ensures exceptional corrosion protection and extended post life\*

#### **JiO<sup>®</sup> POSTS**

## Jio Maxy®

**JiO<sup>®</sup> STAR<sup>®</sup>** 

post ever made

reliable fence post product

> The JiO MaxY post is twice as strong and double the profile of the JiO Star post for improved ground holding and performance

> The original Y shape fence post, Waratah®'s most

> The strongest, toughest, most flexible Waratah Star

> Lengths available: 135cm, 150cm, 165cm, 180cm,

210cm, 225cm, 240cm and 270cm

- > Great intermediate post option compared to timber, concrete or pipe
- Lengths available: 180cm, 210cm, 225cm, 240cm and 270cm

Easier transportation compared to timber, concrete and pipe

Easy installation with a manual or pneumatic driver

Termite proof & fire resistant

Tried and tested in the lab and field

#### **POST SIZE AND HOLE ALIGNMENT GUIDE**

The measurements below show that the first hole from the top of the post is 2.30cm. The measurement then shows distance between holes. The 5.08cm distance is to accommodate the use of JiO<sup>®</sup> post clips.

\*JiO MaxY post is only available in these sizes

#### **BLUE LATCH<sup>™</sup> & GALSTAR<sup>®</sup> POSTS**

- > Each Longlife<sup>®</sup> coated latch is a spring which keeps the latch closed and the fence wire securely attached
- > Slots to suit 3, 4 and 5 barbed wire and plain wire fence configurations and comes with hole spacings to suit attachment of 90cm prefabricated fence
- > Standard JiO<sup>®</sup> Star profile
- > Quicker installation of the fence with minimal use of tie wire and clips
- > Waratah<sup>®</sup> specialised hot dipped galvanized coating (600g/m<sup>2</sup> minimum coating weight)
- > Lengths available: 165cm & 180cm

## ADVICE FOR FARMERS, FROM FARMERS

"When you're contract fencing on a metre rate you need consistency in every aspect, whether it's driving posts or straining wire up. As a third generation fencing contractor in the Perth hills I've found Waratah® is the only way to achieve the best fence at the best price. For the client it's first because it lasts. For me it's first because it works." – Jason Burton, WA

"Due to the dry conditions of the area, myself and other landholders in the cluster have found that the fence has helped maintain pastures in dry conditions with the fence also keeping out other pests." – Dean Hague, NSW

"We've used a lot of Waratah on other properties and it's always lasted. After a few years the fence still looks new." – Eric Ashby, SA

"I use Waratah because I know what I'm getting. After going through the factory and seeing all the testing and the entire manufacturing process from start to finish, I have a lot of confidence in the product. It is 100% Australian made and at a competitive price, I recommend it to all my customers."

– James Cameron, WA

#### FENCE DROPPER

- > Maintain fence integrity and help spread stock pressure to all wires in the fence, reducing overloading and breakage risk
- Quickly fastened to new or existing fence using Longlife Blue<sup>®</sup> dropper clips
- > Heavy galvanized droppers (275/m<sup>2</sup>) for additional life
- Available in 63.5cm, 81.5cm, 94cm, 107cm and 117cm
- > Extra Longlife Blue fence dropper clips available

### WIRE RANGE

#### **WIRE RANGE**

## WIRE

- > Quality wire is essential for the life and performance of your fence
- > Longlife Blue<sup>®</sup> fence wire uses innovative technology exclusive to Waratah<sup>®</sup>

Wire specifications

#### LONGLIFE BLUE® WIRE TECHNOLOGY

## IF IT'S NOT BLUE, IT'S NOT WARATAH®!

#### WARATAH WIRE

The wire core is made with the finest quality steel.

#### **TERNARY LAYER**

A coating layer closest to the wire core comprising of zinc/ aluminium/iron. This layer is enriched in aluminium – enhancing both ductility and corrosion protection. This is the most important layer for the coating performance and is ensured to be "intact" and complete all around the wire.

#### **ZALCOTE® COATING**

The zinc aluminium coating provides barrier and galvanic protection of the steel that does not fracture or flake when tying off.

#### **PERMASEAL® BLUE COATING**

The organic polymer layer of the Permaseal not only gives Longlife Blue colour its unique look, but also adds further protection.

#### LONGLIFE BLUE® WIRE TECHNOLOGY

15

WARATAH

## WHY BUY LONGLIFE BLUE WIRE?

Longlife Blue coating is proven in the lab and in the field for over 20 years.

Good quality fence wire, whether plain, barbed, prefabricated or netting, is key to the life of a fence. If you want a fence that lasts, you'll need Australia's leading fence wire, Waratah<sup>®</sup> Longlife Blue.

#### WARATAH IS THE ONLY VERTICALLY INTEGRATED AUSTRALIAN WIRE MANUFACTURER

Mine – Whyalla, SA

Steel mill – Whyalla, SA & Rooty Hill, NSW

Rod mill – Newcastle, NSW

Wire drawing & coating – Newcastle, NSW & Geelong, VIC

#### **PREMIUM WIRE CORE**

At the centre of Longlife Blue's performance advantage is a premium steel wire core. The quality and consistency of the wire core provides strength, makes it easier to handle and means less breaks. Longlife Blue wire has a thicker wire core, making the wire stronger and more reliable.

#### **PREMIUM WIRE COATING**

Longlife Blue wire products are coated with Zalcote<sup>®</sup> and Permaseal<sup>®</sup> technologies – exclusive to Waratah. Manufactured in Australia to exceed Australian Standards, NATA & Waratah lab testing requirements.

#### LONGLIFE VS HEAVY GALVANIZED VS STANDARD GALVANIZED CORROSION PERFORMANCE

## YIII WIRE

#### **BARBED WIRE RANGE**

#### HIGH TENSILE LONGLIFE BLUE® BARBED WIRE

If a high tensile wire breaks when installing it can cause severe injury. That's why Longlife Blue high tensile barbed wire has a reverse-twist pattern, which allows the wire to unravel when it is placed under an abnormal load and reduces possible breakage.

- > 2.00mm provides 25% greater strength than 1.80mm barb recommended for high pressure situations
- 1.80mm provides 25% greater strength than 1.57mm barb
  recommended for use on boundary fences where falling tree limbs or animal pressure can be greater
- > 1.57mm available for low pressure situation
- Reverse-twist pattern provides maximum strength and safety
- > Our barbed wire range proudly meets all Australian safety standards, meaning if used correctly it will provide you with the safety and security you need
- Consistent and closer barb spacing (10cm) means more barbs for maximum stock pressure and security
- No joins in the wire coil provides consistent strength along the length of the reel and reduces in the risk of injury when straining. Whilst the Australian Standard allows for up to 3 joins per reel at Waratah we don't accept any – rejecting all rolls that require a join
- > The wooden reel allows for easy unwinding of the wire

#### **BARBED WIRE RANGE**

#### IOWA LONGLIFE BLUE® BARBED WIRE

Made from low tensile wire in a continuous twist pattern, lowa offers:

- > A more effective option in fire prone areas compared to high tensile wire
- > Continuous-twist pattern locks the barbs in place to reduce any movement with stock pressure
- > Easier to handle along the fence line than high tensile wire
- > Consistent barb spacing of 10cm
- No joins in the wire coil provides consistent strength along the length of the reel and reduces the risk of injury when straining. Whilst the Australian Standard allows for up to 3 joins per reel at Waratah we don't accept any – rejecting all rolls that require a join
- The wooden reel allows for easy unwinding of the wire
- > Our barbed wire range proudly meets all Australian safety standards, meaning if used correctly it will provide you with the safety and security you need

Waratah barb lifter also available – see page 32

400m

#### ADVICE FOR FARMERS, FROM FARMERS

"Wire and posts are cheap as an investment... it won't take very long to raise the whole standard of your property up to virtually a fortress.

The financial cost of treating biosecurity breaches can far outweigh the cost of a well designed fencing system." – Duncan Campbell, VIC

Duncan Campbell

#### **FENCE WIRE RANGE**

#### **TEMPELEC® LONGLIFE BLUE**

- > A low tensile and versatile fencing solution, ideal for temporary electric fencing and strip grazing
- > Provides greater current-carrying capacity than normal polywires and tapes, and with Longlife Blue coating,

### HORSESIGHTER® WIRE

- >UV stabilised PVC coated wire
- > Has finished size of 5.20mm enclosing a low tensile 4.00mm standard galvanized wire
- > White coating provides improved visibility for horses perfect for use as a top wire with Stocksafe-T<sup>®</sup> Longlife Blue 13/122.5/5 horse wire

## ADVICE FOR FARMERS, FROM FARMERS

"I did a fair bit of research and one of the reasons I chose Waratah<sup>®</sup> is because it is Australian Made. Using Waratah posts has meant we can put up a fence with 1 person instead of 10 people, reducing our labour costs." – Stuart & Leslie MacKenzie, QLD

Stuart & Leslie MacKenzie

#### STOCKLOCK® LONGLIFE BLUE®

A range designed to resist high stock pressures, it can cover most farmers' requirements, from secure boundary fencing, to subdivisions, to cell paddocks or laneway systems.

- Ring-joint design favoured for longer spans and suspension fence designs
- Allows movement of the wires to absorb impact and spread load
- Single picket wire has a 'dropper' effect, providing maximum support
- > Features 2.80mm high tensile top and bottom line wires for added strength (all other line wires are 2.50mm)

#### STOCKTITE® LONGLIFE BLUE®

2FF ON EVERY LINE WIRE^

The range features the hinged joint design that is one of the most widely used designs in Australia and around the world and is favoured in conventional fencing design. There is no stronger knot that locks the horizontal or line wires to each other, which has led to extensive use where larger animals are trying to force their way between the horizontal line wires.

- > Hinged joint suited for long strains and will permanently but flexibly secure the picket wires to the line wires, allowing erection over rolling landscape and through gullies
- > Advanced hinged joint construction acts as a suspension system, flexing with stock pressures and then rebounding back into shape
- > Features 2.80mm high tensile top and bottom line wires for added strength; creating less need for selvedge wires, saving time and money (all other line wires are 2.50mm)
- > Animals can be deterred from burrowing under your fence with the Stocktite skirt 6/51/15, a dedicated section that can be attached to an existing fence line as an apron layout using Ringmaster<sup>®</sup> clips

#### **STOCKSAFE-T® LONGLIFE BLUE<sup>®</sup>**

The range has been specifically designed to prevent animals penetrating the fence.

- > Used to provide an effective barrier against feral animals, such as wild dogs, pigs, wallabies and kangaroos
- > Rigid knot resists vertical wires from being separated, reducing the chance of animals penetrating the fence barrier
- > Size and concentration of animals will help determine the right fence height, picket spacing and tensile strength, to establish an effective barrier against animal incursion
- > Comes with extended wire ends (45cm) for joining or tying off - no need to remove pickets
- > Features 2.80mm high tensile top and bottom line wires for added strength

## STOCKSAFE-T® LONGLIFE BLUE® WITH APRON

WIRE

With an apron (lap fence) already attached, Stocksafe-T Longlife Blue with apron eliminates the gap between the bottom wire and the ground that appears in traditional fence designs.

- Depending on your fence design, this product can provide an effective barrier against feral animals, such as wild dogs, pigs, wallabies and kangaroos
- Apron is preattached to the bottom horizontal wire via a hinged knot
- 30cm section of apron can then be laid on the ground, reducing penetration or digging under the fence line by feral animals

#### STOCKSAFE-T LONGLIFE BLUE FOR HORSES, DOGS & HOUSE YARDS

Designed to keep horses and dogs secured in a yard.

- Made from low tensile (soft) 3.15mm top and bottom line wires and 2.50mm line and picket wires, it has good stretch under stock pressure and is manufactured without sharp edges on wire, reducing injury to valuable stock
- > Ensures the hooves of horses are not entangled and causing injury
- > Low-tensile wire is favoured to reduce potential injury to horses
- Tight 5cm picket spacings reduce the risk of pawing, stepping or walking down the fence

WIRE SIZE	SUGGESTED APPLICATION	roll Length (M)
13/122.5/5	r at 🏫 🐜	50

#### STOCKGRIP® LONGLIFE BLUE®

Favoured for longer spans and suspension fence designs. The single picket wire has a 'dropper' effect and creates a stiffness in the fence, whilst the knot allows for some movement of both the picket and horizontal (line) wire. This unique feature allows the fence to absorb impact and spread load.

- > Continuous vertical picket means less need for droppers, saving you time and money
- > The Stockgrip knot allows you to follow the contour in undulating ground, potentially spacing posts further apart
- > Each line wire has tension curves crimped into it allowing for expansion and contraction in temperature extremes and also to resist loss of tension and permanent distortion on impact
- 2.80mm top and bottom high tensile wires add strength; creating less need for selvedge wires saving time and money. For heavy load and high pressure situations selvedge wires are recommended. All other line wires are 2.50mm diameter

## LONGLIFE BLUE® NETTING

The range is designed for a wide variety of applications.

- > Typically used for small feral animals and also for containment of domestic animals i.e. chickens.
- Netting pattern is produced in reverse twist to better absorb impact
- > Two-ply selvedge wire is used to give the netting added strength
- > For light pressure applications the 1.4mm wire is most suitable, for heavy use high pressure applications in highly corrosive environments the 1.8mm wire is better suited
- For tighter exclusion applications the 3cm mesh spacing is recommended to prevent smaller animals such as kittens (baby rabbits) from getting through the fence. Commonly used at ground level

WARATA

## ACCESSORIES

- > Save time and money by having the right tool for the job with Waratah®'s marketleading range of tools and accessories
- > Whether you are constructing or maintaining your fence, all our equipment is designed to work together with the Waratah Fencing System<sup>™</sup>

Waratah accessories simplify installation, eliminating the need for machinery and extending the life of Longlife Blue® fence wire.

Covered in this section:

Fencing tools

Fencing accessories

Wire joiners

#### **FENCING TOOLS**

## EZYSLOT<sup>®</sup> AND EZYPIPE<sup>®</sup> STRAINER POST DRIVER

Essential for manual installation, these heavy duty, 19kg strainer post drivers have square or round profiles to fit snugly over Ezyslot/Ezypipe posts

> Reinforced gusset handles for added strength

## STAR<sup>®</sup> POST LIFTER

- > Heavy-duty construction with durable electro-plated finish and simple pump-action handle
- > Hardened jaws with roughened face for increased grip and efficiency
- > Designed to be used at the base of the post

#### **BARB WIRE REEL LIFTER**

- Designed to make lifting barbed wire reels safe and easy
- > Requires two (2) people to lift safely
- Rated to lift 75kgs
- > Features rubber handles for comfort

### **STAR POST DRIVER 80NB**

- A fast and easy way to manually install all Waratah® Star posts, including both JiO<sup>®</sup> MaxY<sup>®</sup> and JiO Star posts
- >9kg mass for optimum driving force and less effort
- > Offset handles for ergonomic use and reinforced gusset handles for added strength

#### **FENCING TOOLS**

ACCESSORIES

## THREE-WAY WIRE SPINNER

A multipurpose tool for safely spinning out plain and barbed wire without tangling or overrunning

- Operates in a stationary position or as a 'hand cart' along the fence line for barbed wire
- > Double cradle wire spinners also available

#### THREE-WAY WIRE SPINNER WHEELS\*

- > Removable gel filled wheels prevents wheel puncturing
- > Easily switch between stationary and movable spinner
- > Jockey stand to hold your spinner in place
- > Can be towed behind a farm vehicle
- \*Wire spinner not included

#### WEDGELOCK<sup>®</sup> CLAMP – STANDARD

- > Hold prefabricated wire and netting in place while Wizard® wire strainers (hooked top and bottom of the clamp) evenly tension the wire
- > Standard unit: available in 1.00m, 1.30m and 1.60m lengths to suit prefabricated fence heights

## WEDGELOCK<sup>®</sup> CLAMP – CONTRACTOR

- > Performs the same action as the standard, with hardened wedges for greater holding and reinforced clamp action
- > Designed and tested for use by fencing professionals.
- > Features an additional wedge for tighter securing of the top and bottom selvedge wires.
- Contractor unit: available in 1.60m, 1.90m and 2.00m lengths to suit prefabricated fence heights

#### **FENCING TOOLS**

#### WIZARD® WIRE STRAINER – STANDARD

- Grips wire securely to efficiently tension plain and barbed fence wire
- > Used with the Wedgelock® clamp to strain prefabricated fencing
- 1.80m long chain

#### THUMPA® PNEUMATIC POST DRIVER

- An easy way to drive JiO<sup>®</sup> Star<sup>®</sup>, JiO MaxY<sup>®</sup> and Gripfast<sup>®</sup> trellis posts into virtually any terrain faster than a manual driver, saving time and money
- Change between post types in seconds with a simple twist and release system
- Can also be attached to a mechanically assisted device on a vehicle to assist lifting the driver on and off posts
- Air compressor requirements: for light use ~25CFM, for heavy use >37CFM. Recommended pressure: 80–100PSI. Do not run above 100PSI

#### WIZARD® WIRE STRAINER – CONTRACTOR

- > Grips wire securely to efficiently tension plain and barbed fence wire
- > Used with the Wedgelock clamp to strain prefabricated fencing
- 4.50m long chain for use with larger diameter posts for longer fence strain. Also has a longer handle for easier operation and more leverage (30% less effort)

#### EZYPIPE®/EZYSLOT® GUIDE AND ANCHOR PIN

- Change between post types in seconds with a simple twist and release system
- > For use on Waratah Ezypipe and Ezyslot
- > For use with Thumpa pneumatic post driver
- > 120mm pipe guide also available

#### FENCING TOOLS & ACCESSORIES

#### **TENSER SENSER® WIRE TENSIONING GAUGE**

- > Indicates approximate wire tension to more accurately strain wire – helping to prolong fence life and reduce maintenance time and costs
- > Can be used with plain, barbed, high tensile and prefabricated fencing systems
- > Pre-assembled and calibrated for immediate use

#### E CUTTE FENCING PLIERS\*

- >Waratah wire cutters: a powerful cutter with centric precision cutting edges, designed for use with all fence wire types
- >Waratah fencing pliers: a combination plier designed for gripping surfaces particularly suited to flat material and medium to hard wire

\*Product covered by Bahco® guarantee

ACCESSORIES

#### RINGMASTER® PNEUMATIC **CLIP GUN**

- > A fast, easy way to secure clips to fence wires, reducing physical effort and increasing the number of clips installed per hour
- > Designed for use with Waratah Ringmaster Longlife Blue<sup>®</sup> clips (see page 36)
- > Recommended air pressure: optimum 80PSI. Do not operate above 100PSI

## **STAY PINS**

- > Conveniently pre-cut 30cm straight lengths to save time with no sharp ends for safe use
- > Made from 10mm hot dipped galvanized rod
- > Ideally suited for timber strainer H box assemblies

## مCCESSORIES ه

#### **FENCING ACCESSORIES**

#### HEAVY DUTY PINLOCK INSULATOR

- > Twin pin system locks the insulator firmly in place
- The increased diameter front pin withstands higher wire pressure from stock impact
- > Twin pin matches with the existing JIO® post holes for super fast installation requiring no tools
- > Pinlock wire retention with twist lock closure allows for easy installation/removal of wire under tension

#### LONGLIFE BLUE FARMERS FRIEND® TIE WIRE

- Packaged in an easy to carry 3kg reel which is easy to carry
- Longlife Blue coating for maximum corrosion protection
- > Handy for tying off wire to posts, repairs and general maintenance

### **JIO PORCELAIN CLIPS**

>Waratah has a range of electric clips to suit your needs

#### > JiO porcelain cross over clips:

- Securely hold your porcelain insulators through the cross over Longlife Blue® clip design

#### > Porcelain dual offset:

 Can securely hold 2 porcelain insulators simultaneously available in 2 sizes 80mm/40mm & 80mm/80mm

> Insulators included with every clip

#### RINGMASTER® LONGLIFE BLUE CLIPS

- > Effectively secures all types of fence wire
- > Recommended for use with the Waratah Ringmaster clip gun
- >Made from 1.80mm Longlife Blue wire

#### **JiO<sup>®</sup> POST CLIPS**

- > Effectively secure fence wires to JiO posts, up to 20% faster than traditional clips
- > Simple and easy to use no tools required
- >Made from Longlife Blue® wire

### **STAR® POST CLIPS**

- > Effectively secure fence wires to Star posts
- > Economical and easy to use with fastening tool
- >Made from Longlife Blue wire
- > Can be used on JiO and GalStar® posts

#### **CUT-LENGTH TIE WIRE**

- Conveniently pre-cut 30cm straight wire lengths to save time with no sharp ends for safe use
- >Made from Longlife Blue wire
- > Ties wire to the back of the post
- Available in packs of: 2.50mm x 30cm lengths 3.15mm x 30cm lengths

#### **BARBED STAPLES**

- > An ideal way to secure fence wire to timber posts, with Longlife Blue coating to prolong the life of your fence
- Provide greater holding pressure
- > Available in wire diameters from 3.15mm to 4.00mm and in lengths from 32mm to 50mm
- > Available in 2.5kg, 5kg and 15kg pack sizes

#### **POST EXTENSIONS**

- > A straight, 45 degrees or 90 degrees extension that can be attached to JiO<sup>®</sup> posts
- > Unique JiO holes allow the use of clips and related accessories
- > Ezypipe<sup>®</sup> strainer post extension for 45° and 90° also available

#### **ANTI-SINK PLATES**

- Increases the surface area of fence posts to reduce posts sinking in soft or disturbed soils
- > Designed to fit all Waratah® posts, including Gripfast®
- >Made from 1.40mm galvanized steel (275g/m<sup>2</sup>)

#### **STAR® & MAXY® POST CAPS**

- > High-visibility, UV resistant Star post caps make the posts safer and more visible
- > White or yellow HDPE material for strength and fade resistance
- Pre-formed slots on white Star and MaxY post caps accommodate a wide range of electric accessories
- > Locking strap on yellow post cap prevents cap loss

EZYSLOT

EZYPIPE

### **GATE FITTINGS**

- > Ezyslot<sup>®</sup> and Ezypipe gate fittings for use with their respective strainer post type
- Corrosion resistant, heavy duty, hot dipped galvanized steel
- > Bolts together in minutes with no welding
- > Ring, chain and latch set included

## **CATTLE YARD STRAND**

- Cost effective alternative to traditional timber post and rail systems that is more flexible under stock pressure
- > Made from heavy galvanized, high tensile wire
- The turnbuckle allows tension to be adjusted at any time
- > Use strand grip to attach cattle yard strand to turnbuckles
- > Provides excellent visibility across cattle yards

ACCESSORIES

#### **6MM GALVANIZED WIRE** ROPE 100M

- >Manufactured from standard galvanized wire to form 7x7 strand wire
- Maximum breaking load of 26.8kN
- > Loop on one end for easy attachment
- > Suitable for heavy duty applications that require greater holding capacity with more flexibility
- > Can be used with Waratah<sup>®</sup> flood posts, Gripple<sup>®</sup> Dynamic D6 and around cattle yards for added support

## FLOOD POSTS

The Waratah flood post is an innovative and unique floating fence system designed for use across waterways and flood-prone areas to help protect both fences and livestock.

- > Durable made from strong polyethylene which doesn't rust and is UV/fade resistant
- > Insulated may be used for electric fence applications
- > Versatile 11 stainless steel eyelets and slots for horse and electric fence tape
- > Foot step for easy installation
- > Weighted ballast fill with 6 litres of water using removable bung to set ballast at desired water level. This allows the posts to rise with the water level lifting the fence wires above floating debris

HEIGHT (TOP TO GROUND)	HEIGHT (TOTAL UNIT)	WIDTH	GROSS WEIGHT (WITHOUT BALLAST)	Note: Other components installation sold separate
1280mm	1630mm	320mm	8.75kg	

ts for ely

#### **WIRE JOINERS**

#### **GRIPPLE PLUS**<sup>™</sup>

- > Gripple Plus wire joiners save time and effort when joining wires, tensioning or terminating wire at a strainer post
- > The patented ceramic locking mechanism delivers a strong grip and can take higher loads
- > Available in small, medium and large
- > Suitable for electric fencing applications
- > Housing is die-cast zinc for superior corrosion protection

#### **GRIPPLE PLUS SMALL**

> Suitable for use with 1.40mm - 2.20mm wire

#### **GRIPPLE PLUS MEDIUM**

> Suitable for use with 2.00mm - 3.25mm wire

#### **GRIPPLE PLUS LARGE**

> Suitable for use with 3.25mm - 4.20mm wire

## GRIPPLE<sup>®</sup> T-CLIP<sup>™</sup>/T-CLIP LARGE

- > A great alternative to tying off wire around strainer posts no need for knots, twisting or staples, saving both time and labour
- >T-Clip suitable for 1.80mm-3.25mm wire
- > Use the T-Clip at either end of the fence line to tie-off wire
- > Allows consistent replication and is up to 5 times faster than a manual tie-off
- > Housing is die-cast zinc for superior corrosion protection
- > Recommended for round strainer posts
- >T-Clip large suitable for 4.00mm plain wire & barbed wire

#### **ONE WAY GRIPPLE**

- > Engineered with one channel to butt-up against an end post
- > Integral safety channel to protect the tail wire
- > Ideal for the fast termination of wire or use with end posts in vineyards, orchards and fencing

#### **GRIPPLE® C-CLIP**

- > Perfect for attaching wires onto a cable
- > An innovative, twist-on device
- > Allows horizontal and vertical adjustment along the wire rope
- > Cams lock solidly in place even at angles up to 60°
- > Suitable for suspension of Waratah® flood posts

## **GRIPPLE DYNAMIC D4 & D6**

- > Makes securing cable quick and simple. For maximum strength loop the cable around the base and secure back through the Gripple Dynamic
- > Lockable, inbuilt cam-lock to lock the cable in place to prevent slipping
- >Can be tensioned with the standard Gripple tool
- > The Gripple Dynamic D4 is suited for 4mm to 4.75mm wire rope
- > The Gripple Dynamic D6 is suited to the 6mm galvanized wire rope

## H-POST®/ANCHOR-FAST® KIT

- > Contains a 4mm x 5m heavy galvanized wire rope and Gripple Dynamic D4
- > Can be used as a wire brace or tie-back in multiple strainer post assembly setups
- > Simple, one person assembly, no wire tying skills needed
- > Up to 75% faster to install than traditional methods
- > Re-tensioning capability makes this one of the most versatile products available for fence installation and maintenance
- >Max working load 9.5kN

#### **GRIPPLE GP90**

- > Join and tension in one, in under one minute
- > Eliminates tying & knotting of T-joins and other complex joining methods
- >600kg line load in case of wind lift or heavy crop weight
- > Create overhead structures for cloth/net support, crop/down wires, or fruit canopy

## **GRIPPLE TENSIONING TOOLS**

#### **CONTRACTOR TOOL**

> Metal tool for use with all Gripple sizes makes light work of tensioning your wire by delivering a 10:1 mechanical advantage

#### STANDARD TOOL

> Available with the Gripple starter pack only – includes 50 Gripple Plus medium wire joiners. A cost saving of 25%

#### **WIRE JOINERS**

#### **GROUND ANCHOR**

- Ready to use ground anchor simply drive in, engage and instantly load
- > Supplied with 4mm stainless steel wire rope (1.50m long) for maximum corrosion resistance
- > Suitable for a variety of soils
- Combine with H-Post<sup>®</sup> or Anchor-Fast<sup>®</sup> kit to create complete anchoring solution
- >No. 3 is suitable for medium loads with an anchor 120mm long x 40mm wide
- No. 4 is suitable for heavy loads with an anchor 180mm long x 70mm wide

## GROUND ANCHOR DRIVE

- > 1.75m installation tool for Terra-Lock<sup>™</sup> anchor system and ground anchor
- > Purpose engineered for toughness and durability, making it capable of penetrating the toughest soil
- > Features specific head profiles to match anchors

## TERRA-LOCK ANCHOR

- > Easily installed and instantly loaded anchor system
- > Terra-Lock anchors are designed to provide drive efficiency and maximum load capacity across a wide range of applications including erosion control and soil stabilisation
- > Supplied with a 1.5m long 4mm stainless steel wire rope for in-ground strength
- > Meets the requirements of the most demanding erosion control installations where increased performance characteristics are required over conventional pins, stakes and staples

## GRIPPLE® TERRA-PINS & DRIVE TOOL

- > Designed to hold all types of turf reinforcement matting, erosion blankets, geotextiles and landscaping fabrics
- >Quick and easy installation with the Gripple Terra-Pin<sup>™</sup> drive tool
- > Available for both hard and soft ground

#### **BUILD & MAINTAIN**

## **HOW TO BUILD YOUR FENCE**

#### **BUILD STEP-BY-STEP**

Using quality Waratah products and the right accessories will help even first timers do a professional job. Learn more about the right steps to building a high-performing fence below.

#### **HOW TO MAINTAIN YOUR FENCE**

Even the very best fences require some maintenance to ensure ongoing peak performance. Walk or drive along your fence lines regularly to check for fence line failure points. Most maintenance can be done on the spot using Waratah tools and accessories. This will extend the working life of your new fence line, saving you time and money in the long run.

#### CLEAR ALONG FENCE LINES

Remove any debris or overgrown grass from around the fence. This helps prevent corrosion and heat damage in the event of a fire and minimises the risk of animals using debris to help breach the fence. Spray fence line to reduce foliage.

#### REPAIR EROSION POINTS

After heavy rain, check that soil erosion under your fence does not compromise your boundary and let stock out or unwanted animals in.

#### CHECK POSTS AND WIRE TENSION

Straighten or replace broken posts with the same or stronger posts like the JiO® MaxY®. Use a Tenser Senser® to check wires do not relax over time, and a Wizard® wire strainer and Gripple® wire joiners to correct any issues.
